

The British Saddleback has more sow lines (28) than any other Traditional Breed and so it may not be realistic to have all the lines represented in a single region. Whilst we will try to increase the distribution of lines around the regions the main focus will be on reducing the number of lines held in less than 5 herds. These are Alvis, Duchess, Fidra, Joyful, Lassie, Mary, Red Rose and Rose. Of these Alvis with only two sows would be a priority. We will also keep an eye on the Bell, Lottie and Rosette lines which have seen significant reductions in the numbers of herds. A programme has already been undertaken to mover the Fidra line. The Gamma line is only found in Ireland at present but if it can be re-imported to the UK it will also be included in this programme.

Four of the 14 boar lines are being bred in less than 5 herds. Dictator, General, Stockbroker and Viscount. All these boar lines have been stored in the Genebank. A breeding programme for the rarer boar lines has already the been able to add the Dominator, Consort and Earl Simon lines to the Genebank whilst at the same time it has increased the number of herds with these lines. That programme is continuing and we hope to have a Guardsman next year with a Carl to follow. Work is ongoing to improve the Viscount line before distributing it to more herds.
